Description

The Addressable Modules, Dry Output Type, 1 Address with 4 Circuits, 2 Addresses with 8 Circuits, 4 Addresses with 16 Circuits are the relay contact modules that are programmed to activate when mapped devices are activated.

The FRRJ001A-Y-SS has 1 address with 4 circuits/contacts per unit, so that 4 different circuits/contacts can be controlled under 1 address number.

The FRRJ001-Y-2SS has 2 addresses with 8 circuits/contacts per unit, so that 4 different circuits/contacts can be controlled under 1 address number. The FRRJ001A-Y-SS and the FRRJ001-Y-2SS also have 4 input circuits and 8 input circuits respectively which can be used to have return signals from connected devices for activation confirmation of the connected devices, or can be used to have input signals from normally-open contact devices.

The FRRJ001-Y-4SD has 4 addresses with 16 circuits/contacts per unit, so that 4 different circuits/contacts can be controlled under 1 address number. The FRRJ001A-Y-SS, the FRRJ001-Y-2SS and the FRRJ001-Y-4SD are slim units, and they can be installed easily.
